

Botox Brandon

Botox Brandon - By definition, a wrinkle is a ridge, crease or fold in the skin. Skin wrinkles usually appear as a result of the processes of aging, including: glycation or also from the extended immersion of the skin in water. Skin wrinkling is caused by aging, sun damage, habitual facial expressions, poor hydration, smoking and different other factors. Skin wrinkles in the water caused by lengthened water exposure that causes the outer layer of skin to absorb water. Depletion of water within the body like with dehydration likewise can result in the puckering of the skin. Cortisol is one more element that leads to degradation of skin collagen.

Dermal fillers are frequently utilized to be able to remedy wrinkles and different skin depressions. They are injectable products that are normally a kind of soft tissue. Dermal fillers are meant to enable injection into the skin for reasons of enhancing the appearance of the skin. The most popular products are based on hyaluronic acid.

Botulinum Toxin

The neurotoxin protein, botulinum toxin, is made by the bacterium *Clostridium botulinum*. The most popular kind of botulinum toxin is called onabotulinumtoxinA or "Botox". This particular kind of botulinum toxin is made by Allergan Inc. for both therapeutic and cosmetic usage. Botox is utilized in the treatment of migraine headache and spasmodic dystonia or spasmodic torticollis that is a neuromuscular disorder which involves the neck and head. Botox has numerous uses together with its cosmetic application.

In the year 2009, Americans now had a new obtainable form of botulinum toxin. This new type, made by Ipsen, is known as Dysport or abobotulinumtoxinA. It has received approval by the FDA and is currently made use of to be able to remedy cervical dystonia and glabellar lines in adults. Botox and Dysport on the other hand, are not interchangeable since the two drugs have different molecular structure.

The Botulinum toxin is able to treat a lot of wrinkles by immobilizing or relaxing the muscles which result in wrinkles. This particular toxin is not appropriate for the remedy of all wrinkles, as is seen with glabellar lines, that happen between the eyebrows in adults. Any other usage of this toxin is considered "off-label" use and is not approved by the FDA.
