Reiki Brandon - Reiki is a healing technique which started in Japan and is intended for healing, relaxation and stress reduction. Reiki is based on the premise that energy flows all through all living things. This unforeseen energy is referred to as "life force energy" and has several names. The Chinese call this energy as Chi; it is known as Ki or Ti in Hawaiian, bioplasma, orgone, odic force are some other terms and Prana in Sanskrit. Several customs know its existence and it goes by different terms. Reiki practitioners think that ki is all around us and it can be harnessed by the mind.

Across the world, numerous traditions from ancient times to today have shared in the belief in this interconnectedness of all life. Even if there is lack of scientific evidence, lots of people believe and feel this unseen force. When people have low reserves of life energy, it is believed that they are more susceptible to tension and sickness. Reiki practitioners think that they are able to channel this energy so as to assist their customers. Reiki heals and works by breaking up the negative energy and replacing it with positive, healing energy. This good energy passes through the practitioner's hands. A lot of experienced Reiki practitioners experience their hands becoming hot while giving a treatment.

The techniques are somewhat easy to learn, even if Reiki is not taught in the traditional sense. The ability to utilize Reiki is transferred from the Reiki master to the student. The ability for a person to perform Reiki does not depend on the condition of one's intellectual capacity or their spiritual development, hence making Reiki universally accessible. It has been taught to thousands of people of different ages and diverse backgrounds across the world for a lot of years.

Reiki has gained popularity as a treatment for assisting spirit, body and mind. This makes it very different from traditional allopathic or Western medicine that conventionally only focuses on the sickness itself and not essentially the root cause.

The term Rei means "universal," or forever existing. There has been studies done into the mysterious meaning of the term which has revealed a more accurately interpreted description meaning "spiritual consciousness" or "supernatural knowledge". This "God-consciousness" is believed to be all-knowing and is thought to be capable of seeing the cause of all issues and afterward heal them.

Ki circulates all through and around living organisms, but when the living things dies the life force or ki dies. It has been discovered that ki is also the source wherein thoughts, emotions and spiritual life are drawn. The Chinese put great significance on "Chi" as they call it and have studied it for numerous years. One of their classic toms is over 4,000 years old and lists 32 various kinds of Chi!

Individuals who practice martial arts for physical training and for mental development likewise make use of Ki. In addition, it is used in meditative breathing practices referred to as Pranayama and shamans in different traditions use it for healing, psychic awareness and divination.

Reiki could be interpreted as a spiritually guided practice even though it is not a religion. Teachers normally recommend that practitioners live in accordance with certain ethical ideals and do their best so as to promote peace and harmony in the world as well as in themselves.
